Mr. Dennis Marcin HELIX Environmental Planning, Inc. 7578 El Cajon Boulevard, Suite 200 La Mesa, California 91942

Subject: PLAZA CAMINO REAL

2525 EL CAMINO REAL CARLSBAD, CALIFORNIA

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Dear Mr. Marcin:

In accordance with your request and on behalf of HELIX Environmental Planning, Inc., we have conducted a Phase I Environmental Site Assessment for Plaza Camino Real located at 2525 El Camino Real in Carlsbad, California. It is further identified by the following San Diego County Assessor's Parcel Numbers (APNs):

- 156-301-06 through 156-301-12
- 156-301-14
- 156-302-06 through 156-302-10
- 156-302-12
- 156-302-14 through 156-302-27
- 156-302-30 through 156-302-32, and
- **1**56-120-59

Westfield is planning to expand the eastern and southern side of the existing mall structure, the southeast corner of the existing parking lot, and the theatre building and the adjacent parking lot located south of Marron Road. The proposed plan is to demolish, reconfigure, and/or reconstruct approximately 180,000 square feet of the existing commercial structure with a net increase of 35,417 square feet of new commercial space to create an approximately 1,120,000 square foot mall.

The following table presents a summary of our findings and opinions, including known or suspect recognized environmental conditions (RECs), historical RECs and de minimis environmental conditions (i.e., conditions that generally do not present a material risk of harm to public health or the environment).

Assessment Category	Potential REC or REC (Y/N)	Recommended Actions	Report Section
Hazardous Substances/Petroleum Products	Y	NFA	2.2, 2.2.1, 5.1.1, 5.2, and 5.3
Hazardous Wastes	N	NFA	2.2, 2.2.2, and 5.3
Non-Hazardous Wastes	N	NFA	2.2
Aboveground/Underground Storage Tanks	Y	NFA	2.2, 5.1.1, and 5.4
Unidentified Substance Containers	N	NFA	2.2
Equipment Potentially Containing PCBs	N	NFA	2.2
Wastewater Systems	N	NFA	2.2 and 5.3
Evidence of Releases	N	NFA	2.2 and 5.4
Pools of Liquid, Pits, Ponds, Lagoons	Y	NFA	2.2 and 2.2.3
Wells	Y	NFA	2.2, 2.2.4, 3.3, 5.3 and 5.4
Other Site Issues	Y	NFA	2.2, 2.2.5, 4.3, and 5.4
Nearby Properties	N	NFA	2.3, 4.1, 4.3, 5.1, and 5.1.2
Historical Land Use – Site	N	NFA	4.0, 4.1, 4.3, 5.1.1, and 5.4.1
Historical Land Use – Nearby Properties	Y	NFA	4.0, 4.1, 5.1.2, and 5.4.2

Recommended Action:

AA = Additional activities should be conducted regarding the de minimis environmental condition(s) identified at the Site NFA = No further action required at this time.

This assessment has revealed no evidence of RECs in connection with the property; however, the following may be considered potential environmental concerns:

- The current structures onsite were built in the late 1960s and 1970s. Therefore, there is a risk that the structure contains asbestos containing material (ACM) and/or lead containing paint (LCP). We recommend conducting an asbestos and lead survey prior to any renovation/demolition activities to confirm whether evidence exists that the structure contains significant sources of ACM and/or LCP.
- Based upon the review of the County of San Diego Department of Environmental Health (DEH) case files, the plumes from adjacent properties and the Firestone property have not migrated towards the proposed construction area. However, if groundwater or impacted soil is encountered during construction, an environmental professional should be requested to assess the site conditions.

Project No 09833-06-01 - 2 - March 2, 2010

Detailed information regarding pertinent issues identified during the Phase I Environmental Site Assessment is provided in the accompanying report, along with our conclusions and recommendations. Please call if you have any questions.

Very truly yours,

GEOCON INCORPORATED

Elizabeth A. Hartung

PHASE I ENVIRONMENTAL SITE ASSESSMENT

1. INTRODUCTION

This report presents the results of a Phase I Environmental Site Assessment (ESA) for the approximate one hundred acre property located at 2525 El Camino Real in Carlsbad, California (the Site). The Site is currently occupied by the Westfield Plaza Camino Real Shopping Center in an enclosed two-story slab on-grade structure with approximately 145 retail specialty shops with additional detached buildings, consisting of approximately 1.1 million square feet. Westfield is planning to expand the eastern and southern side of the existing mall structure, the southeast corner of the existing parking lot, and the theatre building and the adjacent parking lot located south of Marron Road. Our assessment will primarily focus on the areas that will be affected by the proposed construction. We have prepared this report in accordance with the request of Mr. Dennis Marcin of HELIX Environmental Planning, Inc. (Client). The following sections identify the purpose, scope of work and limitations/exceptions associated with the ESA and the location of the property.

1.1 Purpose

The purpose of the Phase I ESA was to identify potential "recognized environmental conditions" (RECs) as defined by the American Society for Testing and Materials (ASTM) Designation E 1527-05 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. Section 1.1.1 of the ASTM Standard E 1527-05 defines the term "recognized environmental conditions" as "the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property." The term, as further defined by ASTM, "is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies." Conditions determined to be de minimis are not recognized environmental conditions.

The Phase I ESA also was conducted to satisfy the requirements of 40 Code of Federal Regulations (CFR) Part 312 titled *Standards and Practices for All Appropriate Inquiries*, as required under Sections 101(35)(B)(ii) and (iii) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The purpose of conducting an All Appropriate Inquiries (AAI) investigation into the previous ownership and uses of a property is to meet the provisions necessary for the landowner, contiguous property owner, and/or bona fide prospective purchaser to qualify for certain landowner liability protections under CERCLA. To assist in understanding the terminology contained in this report, a list of terms associated with the above-referenced standard and regulation, is provided in Appendix A.

The main components of this report, as specified by the referenced standards, include the following:

- **Site Reconnaissance:** The objective of the site reconnaissance is to obtain information indicating the likelihood of identifying recognized environmental conditions (RECs) in connection with the Site. The site reconnaissance was for the Site and adjoining properties only and did not include moving on-site debris, vehicles, or other objects to allow for observation of the underlying ground surface. Off-site properties and features were viewed from the Site, nearby public rights-of-way, and via a drive-by reconnaissance of the surrounding area.
- **Physical Setting:** The objective of reviewing physical setting references is to obtain information concerning the topographic, geologic, and hydrogeologic characteristics of the Site and vicinity. Such information may be indicative of the direction and/or extent that a contaminant could migrate in the event of a spill or release.
- **Site History:** The purpose of consulting historical references is to develop a history of the previous uses of the Site and surrounding area in order to help identify the likelihood of past uses having led to RECs in connection with the Site. Historical sources reviewed included aerial photographs, site ownership and/or use information (as made available by the Client). In addition, we conducted interviews with persons who were reasonably expected to be knowledgeable about historical and/or current conditions at and uses of the Site.
- **Records Review:** The purpose of the records review is to obtain and review records that will help identify RECs at or potentially affecting the Site. We reviewed client-provided and publicly available federal, state, and local regulatory agency records pertaining to the Site.

1.2 Scope of Services/Exceptions

Our Proposal No. EP-2009-067A outlines the scope of services proposed for the study. A copy of the proposal is presented in Appendix B. We performed the services outlined in the proposal with the exception of the following:

- A 50-year chain-of-title report pertaining to the Site was not provided by the Client or obtained by us at the request of the Client and
- The site location is not mapped on the Historical Sanborn Fire Insurance Maps.

1.3 Site Location

The Site is located west of El Camino Real, south of Highway 78, north of Marron Road, and east of South Vista Way in Carlsbad, California. The approximate location of the Site is shown on the Vicinity Map presented as Figure 1. The Site consists of one large structure and multiple detached buildings with the associated asphalt parking lot. It is currently used as a shopping mall with specialty shops. The attached anchor stores are JC Penny, Macy's Women, Macy's Men and Home, and Sears. The anchor store on the east side of the mall was previously occupied by Robinsons-May but has been vacant for the last three years. Currently West Buffet, MovieMax Cinema, and First National Bank of North County are leasing the land from Westfield. Westfield also owns the land where Sears Automotive Center is located. The Firestone Auto and Tire Store (Firestone) is owned by JC Penny.

The parking lot is owned and managed by the City of Carlsbad.

2. SITE RECONNAISSANCE

We conducted a reconnaissance of the Site and observed of adjacent properties on January 29, 2010 and were accompanied by the Assistant General Manager of Westfield, Mr. Chris Holman. Observations noted during the site reconnaissance are summarized below, along with any limitations encountered during the reconnaissance activities. Westfield is planning to expand the eastern and southern side of the existing building the southeast corner of the existing parking lot, and the theatre building and parking lot south of Marron Road. The proposed plan is to reconfigure or demolish approximately 180,000 square feet of the existing commercial structure to make room for approximately 1,120,000 additional square feet of commercial space. Figure 2 illustrates the Site plan with the proposed and reconfigured building footprint.

2.1 Physical Limitations

During the site reconnaissance, no physical limitations (e.g., locked rooms, fenced areas) were encountered during the site reconnaissance. We did focus our site reconnaissance on the areas of proposed construction, and areas that may contain hazardous materials. At the time of the site reconnaissance, the weather was partly cloudy with a temperature of approximately 65 degrees Fahrenheit.

2.2 Onsite Reconnaissance

The Site is comprised of an enclosed two-story, slab on-grade structure occupied by Westfield Plaza Camino Real that encompasses approximately 145 retail specialty shops, with detached buildings, and the associated parking lot. Mr. Holman stated that the first phase of development in 1968 was constructed with timbers and poured-in-place concrete. The second phase of development in 1975 was constructed from concrete tilt-up sections. The detached buildings constructed during the first phase include structures for First National Bank, the former Country Wide Loans, MovieMax Theater, West Buffet, and Firestone. The buildings appear to be in good condition, but due to the age of the structures it is possible that asbestos containing material (ACM) may be present in the plaster, pipes, tile and carpet mastic, or that lead containing paint (LCP) may be present in the wall paint. The buildings flooring cover varies from carpet, vinyl sheet, or vinyl tile with mastic.

The following buildings have heating, ventilation, and air-conditioning (HVAC) units mounted on the rooftops: the first phase of construction; the MovieMax; the former Country Wide Loans; and the First National Bank. A cooling tower is located on the roof of the Robinsons-May building. The Site does not have a back-up generator, but has back-up lighting powered by batteries. We observed various cleaning and housekeeping chemicals, varying from floor cleaners and waxes, to paint and sealers. The maintenance building also contains 5-gallon containers of cleaning solutions for the HVAC systems.

The asphalt parking lot is owned by the City of Carlsbad and the condition of the pavement varies in condition. The ground-covered included concrete loading docks and driveways for the anchor stores. Concrete sidewalks and landscaping were observed in select locations surrounding the exterior buildings.

The Site has two cardboard compactors and one wet trash compactor located onsite. One cardboard compacter is located on the south side of the mall, and a cardboard compactor and the wet compacter is located on the north side of the mall west of JC Penny. Outdoor electrical rooms are present on the south side of the mall between Macy's and Sears.

The former Robinsons-May anchor store has been vacant for three years. Kirk, the maintenance engineer for Westfield, guided us through the building. We observed one passenger hydraulic elevator and one freight hydraulic elevator. The building appeared to be in poor condition with visible water damage on the second floor ceiling and piles of construction debris. A water leak originating from the cooling tower was visible in the southeast portion of the building. One 55-gallon drum was also present in the loading dock area.

The MovieMax Theater was part of the first phase of construction. We observed a water heater and electrical panel on the second floor in the film room. We also observed a break room area.

JCPenny Optical, Lens Crafters, and Sears Optical store chemicals but they would not be considered a REC. JCPenny Portrait Studio, Sears Portrait Studio, and Star Shots are located onsite. Mr. Holman stated that the developing shops for the photos are located offsite.

The following table summarizes the observations made during the site reconnaissance regarding issues of potential environmental concern. Detailed information regarding pertinent issues identified during the site reconnaissance is provided, as appropriate, in the paragraph following the table. A Site Plan is included as Figure 2. A listing of the current tenants is provided in Tables 1 and 2. Photographs taken during the site reconnaissance are presented in Appendix C.

Project No. 09833-06-01 - 4 - March 2, 2010

Issue of Potential Environmental Concern	Observed	Not Observed
Hazardous Substances/Petroleum Products	✓	
Hazardous Wastes		✓
Aboveground/Underground Storage Tanks	✓	
Unidentified Substance Containers		✓
Polychlorinated Biphenyls		✓
Wastewater Systems (drains/clarifiers/sumps)		✓
Evidence of Releases (stains, odors, stressed vegetation)		✓
Pools of Liquid, Pits, Ponds, Lagoons	✓	
Wells	✓	
Other Site Issues	✓	

2.2.1 Hazardous Substances/Petroleum Products

The storage and use of petroleum hydrocarbons were observed in two locations onsite. A more thorough discussion is presented in 2.2.2.

2.2.2 Aboveground/Underground Storage Tanks

We observed a waste oil aboveground storage tank (AST) located in the Firestone. Firestone also had four 55-gallon drums containing Mogul AG471. This facility has 12 hydraulic lifts and in general, housekeeping conditions appears to be good. Firestone does not appear to be considered a REC. Please see Section 5.4 for the County of San Diego Department of Environmental Health (DEH) case review.

We observed one waste oil AST located in the Sears Automotive Center on the northwest side of the facility along with six 55-gallon drums containing waste oil, and a waste antifreeze container. The facility also utilizes 16 hydraulic lifts for automobiles. In general, housekeeping conditions appears to be good and the Sears Automotive Center does not appear to be considered a REC. Please see Section 5.4 for the DEH case review.

Macy's stores grease from the restaurant in a 55-gallon drum.

2.2.3 Pools of Liquid, Pits, Ponds, Lagoons

Buena Vista Creek, observed north of the Site, trends east to west and flows into the Buena Vista Lagoon approximately ½ mile west of the Site.

Project No. 09833-06-01 - 5 - March 2, 2010

2.2.4 Wells

Groundwater monitoring wells were observed onsite near Firestone property. This facility and the groundwater monitoring wells are further discussed in Section 5.4.

2.2.5 Other Site Issues

Based upon the age of the building onsite, LCP and/or ACM may be present. Major disturbance or removal of LCP and/or ACM should be preceded by a LCP and ACM survey by qualified professionals. Section 4.3 provides information regarding a previous asbestos survey.

2.3 Offsite Observations

Observed and reported current uses of adjacent properties and surrounding areas are described below:

Direction	Adjacent Properties	Surrounding Area
North	Mohnacky Animal Hospital of Carlsbad and South Vista Way	78 Freeway and vacant land, Oceanside Sewer Treatment and Pump Station Facility.
East	El Camino Real	Carlsbad Plaza Shopping Center, Shell Station*, Chevron Station*, Day and Night Cleaners*
South	Marron Road	Marron Road , residential developments, and Carlsbad Plaza South Shopping Center
West	South Vista Way	Shopping center with Marshalls and Souplantation

^{*}Note: Please see the DEH case summary's in Section 5.4 for information on the properties.

3. PHYSICAL SETTING

The following sections include discussions of topographic, geologic and hydrogeologic conditions in the vicinity of the Site, based upon our document review and our visual reconnaissance of the Site and adjacent areas.

3.1 Topographic Features

Information concerning the topography and previous development of the Site and properties located in the vicinity of the Site was obtained from a review of a U.S. Geological Survey (USGS) topographic map for the San Luis Rey, California quadrangle. A reproduction of a portion of the USGS map is presented as Figure 3. According to the map, the Site elevation depicted on the map ranges from approximately 20 to 40 feet above Mean Sea Level (MSL). Surface drainage appears to flow to the west-northwest toward the Buena Vista Lagoon (USGS, 1975).

The adjacent properties to the north and south of the Site are color coded with house omission tint, indicating dense residential development. Large buildings associated with adjacent shopping centers are present north, east, and west of the Site. The area southwest of the Site is shaded green, depicting as park land. El Camino Real is shown as a high duty road east of the Site. Interstate 5 is shown west of the Site and the 78 Freeway is shown north of the Site. Topographic features as noted on the map are generally representative of observed conditions in the vicinity of the Site during our reconnaissance.

3.2 Geologic Conditions

The Site is located in the Peninsular Ranges geomorphic province of Southern California (Norris and Webb, 1990). This geomorphic province encompasses an area that extends 125 miles from the Transverse Ranges and the Los Angeles Basin south to the Mexican Border and beyond another 775 miles to the tip of Baja California. In general, the province consists of rugged mountains underlain by Mesozoic igneous and metamorphic rocks to the east, and a dissected coastal plain underlain by Cenozoic sediments to the west. The province varies in width from approximately 30 to 100 miles, and is traversed by a group of faults and fault zones trending roughly northwest.

The Site is mapped as underlain by alluvial wash deposits from the late Holocene that consist of unconsolidated bouldery to sandy alluvium of active and recently active washes. The wash deposits are underlain by the Santiago Formation which consists of three distinctive parts. A basal member that consists of buff and brownish-gray, massive, coarse-grained, poorly sorted arkosic sandstone and conglomerate (sandstone generally predominating). In some areas the basal member is overlain by gray and brownish-gray (salt and pepper) central member that consists of soft, medium-grained, moderately well-sorted arkosic sandstone. An upper member consists of gray, coarse-grained arkosic sandstone and grit. Throughout the formation, both vertically and laterally, there exists greenish-brown, massive claystone interbeds, tongues and lenses of often fossiliferous, lagoonal claystone and siltstone. The Site may also be partially underlain by fill resulting from human construction (Kennedy and Tan, 2005).

3.3 Regional Groundwater Quality and Occurrence

Information sources prepared by the California Department of Water Resources (CDWR) and the California State Water Resources Control Board (SWRCB) were reviewed for information pertaining to groundwater quality and occurrence in the vicinity of the Site. Based on these sources, the Site is located in the El Salto Hydrologic Sub-Area (4.21) of the Buena Vista Creek Hydrologic Area (4.20) within the Carlsbad Hydrologic Unit (4.00). The Carlsbad Hydrologic Unit is a roughly triangular-shaped area of about 210 square miles. (SWRCB, 1994). Groundwater occurring within the Carlsbad Hydrologic Unit has existing beneficial use designations for municipal and domestic supply, agricultural supply, and industrial supply purposes. (SWRCB, 1994).

Project No. 09833-06-01 - 7 - March 2, 2010

There are no groundwater wells located within an approximately 2 miles of the Site (CDWR, 2004). Based on general knowledge of the local hydrogeology in the area, groundwater beneath the Site is likely present approximately 13 to 15 feet below grade and flows in the northwestern direction; however depths may vary with land surface elevation, proximity to creeks, drainages, alluvial deposits, seasonal rainfall, and local irrigation practices.

4. SITE HISTORY

We conducted a historical records search regarding the Site and surrounding areas. This included a review of one or more of the following sources that were found to be both reasonably ascertainable and useful for the purposes of this Phase I ESA: historical aerial photographs, historical fire insurance maps, historical city directories, building permits and plans, land title records, topographic maps, property tax records, zoning/land use records, interviews with property representatives, and reviews of prior environmental assessment reports/documents regarding the Site.

Based on our review of historical sources, and our interview with the site representatives, the Site was vacant until the late 1960's when the grading operations began at the Site. The first phase of the construction in 1968 included the eastern section of the mall, the First National Bank, and the area south of Marron Road. The second phase of the construction in 1979 included the western addition to the main section of the mall. From 1988 to 1989, the Site underwent renovation in the common areas of the main mall.

The following sections summarize information obtained from the historical sources utilized for this assessment, including publicly-available sources, interviews with site personnel, and reviews of environmental documents, if available.

4.1 Publicly-Available Information

Publicly-available historical records, including aerial photographs, historical topographic maps, historical city directories, were available for the Site and adjacent properties for selected years dating from 1901 to 2005. The Site is listed in the City Directory under multiple listings beginning in 1970. The following tables present a summary of information obtained from the sources used for this assessment. A listing of the aerial photographs reviewed and the scale of each photograph is provided in Appendix D. Historical topographic maps and their respective scales are provided in Appendix E. No Sanborn maps were available for review (see letter in Appendix F) and the City Directory is provided in Appendix G.

Project No. 09833-06-01 - 8 - March 2, 2010

Year	Interpreted Use from Aerial Maps				
Y ear	Subject Site	Adjacent and Vicinity Properties			
1939	The Site appeared graded but undeveloped.	The surrounding area appeared graded with the exception of the southwest corner where dense vegetation was observed. Two roads were visible where the present day El Camino Real and the 78 Freeway are located. A single structure on a lot was visible east of El Camino Real.			
1946	Vegetation was observed in the graded areas on the Site.	Vegetation was observed in the areas where it had previously been graded. The eastern adjacent property has been reconfigured and appeared to have three additional structures.			
1953	Similar to the 1946 aerial photograph.	Agricultural land use and associated structures were present south and northwest of the Site. The northern and eastern properties appeared graded. The area southwest of the Site was covered in dense vegetation.			
1963	Similar to the 1953 aerial photograph.	Construction activities for the 78 Freeway were apparent north of the Site El Camino Real appeared to be improved roadway. Residential developments were present south of the Site. Residential structures were present northeast and northwest of the Site. A structure south of the 78 Freeway was observed.			
1974	The eastern section of the mall structures at the Site had been constructed with the associated parking lots. The three structures south of Marron Road had been constructed	The 78 Freeway appeared to be in the current configuration. Residential and commercial development is prominent in the surrounding areas with the exception of the dense vegetation to the southwest.			
1990	The western addition on the mall had been constructed. The mall appeared to be in its current configuration.	The commercial and residential development in the surrounding areas was complete. A small area of dense vegetation was present southwest of the Site.			
1994	Similar to the 1990 aerial photograph.	Similar to the 1990 aerial photograph.			
2002	Similar to the 1994 aerial photograph.	Similar to the 1994 aerial photograph.			
2005	Similar to the 2002 aerial photograph.	Similar to the 2002 aerial photograph.			

Year	Interpreted Use from Topographic Maps				
		Adjacent and Nearby Properties			
1901	The Site appears to be vacant.	The adjacent properties appear to be vacant. Buena Vista Creek trends east to west connecting with Buena Vista Lagoon and is located north of the Site. El Camino Real appears east of the Site.			
1904	Similar to the 1901 topographic map.	Similar to the 1904 topographic map.			

Project No. 09833-06-01 - 9 - March 2, 2010

Year	Interpreted Use	se from Topographic Maps		
rear	Site	Adjacent and Nearby Properties		
1947	Similar to the 1904 topographic map.	The 78 Freeway is present north of the Site. El Camino Real road has been improved. Residential structures are present north and south of the Site. A game preserve is present northwest of the Site.		
1968	The Site topography appears to have been graded.	An Oceanside sewage treatment plant and pump station is present north of the Site. Residential development is present south of the Site, adjacent to the game preserve.		
1975	The eastern side of the Site appears to have been developed.	Similar to the 1968 topographic map.		
1997	The western side of the Site appears to have been developed. The Site appears to be in its current configuration.	Residential and Commercial developments are present surrounding the Site.		

4.2 Interviews

We interviewed Mr. Chris Holman, the Assistant General Manager for Westfield regarding current and historical uses and environmental issues associated with the Site. Mr. Holman stated that to the best of his knowledge, the Site has been occupied by various retail stores, restaurants, and service stores for the last 40 years. Westfield has owned its parcels since the initial development at the Site. Mr. Holman indicated that, to the best of his knowledge, the property had remained largely unchanged since the renovation in 1988. Mr. Holman stated that there were no historical or current pools of liquid or standing water noted at the Site, but noted that the concrete deck located in the southeast has water leaks that penetrate the concrete. He believes that the sewage disposal system made of cast iron is approximately 30 to 40 years old. Mr. Holman stated that the material safety data sheets, safety plans, illness and injury prevention plans, and a global risk report are available in the management office at the Site. Mr. Holman noted that the Site received a notice from the City of Carlsbad – Storm Water Protection Program to maintain the trash area in the north parking lot.

4.3 Prior Environmental Documents/Reports

We reviewed the report by Dames and Moore titled *Phase I Environmental Site Assessment Westfield Shoppingtown Plaza Camino Real, 2525 El Camino Real, Carlsbad, California*, dated May 10, 2000. Dames and Moore did not identify RECs at the Site, but did state that the following may be potential environmental concerns:

- A waste oil tank was removed from the Sears Automotive Center in 1986.
- Westfield mentioned that a clarifier, ASTs, and 16 hydraulic lifts are/were present at the Sears
 Automotive Center. Dames and Moore stated that the Sears Automotive Center facility could
 have the potential to impact the subject property and should consider additional evaluations if

and when operations at this location change and/or future construction activities occur in this area.

Dames and Moore did not observe off-site RECs known to have impacted the subject property. They did observe the following three off-site issues of potential environmental concern:

- The Firestone property (formerly JC Penny Auto Center) located approximately 400 feet north of the mall structure had pump islands, product lines, and underground gasoline tanks removed in March 1984 from the east end of the automotive center. An underground waste oil tank was removed form the northwest side of the automotive center in 1990, at which time they discovered groundwater and soil contamination. Fifteen monitoring wells were installed in 1990 and 1991, and remediation efforts were initiated in November 1994 when they installed eight fluids extraction wells. At the time of this Phase I ESA, the case had not been closed, but Dames and Moore noted that it was unlikely that the property impacted the Site because the groundwater monitoring report from November 1994 stated that the groundwater gradient appeared to be flowing the northwest away from the Site.
- Dames and Moore stated that the Chevron Station was listed as having a gasoline leak associated with the USTs in 1987. The leak was repaired, but the groundwater had been impacted and a remediation plan had been submitted. The Chevron Station is located upgradient from the West Buffet subsurface portion of the Site, and therefore, could present a possible environmental concern to the Site.
- The Camino Shell Station is located up-gradient from the Site, approximately 300 feet northeast of the MovieMax Theatre ground-lease and approximately 600 feet southeast of the West Buffet ground-lease. In 1992, a gasoline leak was reported at the Shell Station. This facility could impact the Site based upon the up-gradient location.

Asbestos was identified at the Site during a limited asbestos screening survey in the following locations:

- Pipe elbow insulation Main Mall, 2nd Floor Mechanical Room. Approximately 50 elbows were observed. Dames and Moore estimated the removal cost for these locations to be between \$2,000 and \$4,000 in the year 2000.
- Acoustical ceiling texture First National Bank, Lobby/Teller area. Approximately 1,200 square feet of acoustic ceiling texture was observed. The estimated cost in the year 2000 to remove the acoustic ceiling texture was \$5,000 to \$7,000.

Dames and Moore observed the friable ACMs to be in good condition at the time of their site reconnaissance. They also stated that non-friable ACM in the form of floor tile and associated mastic, sheet flooring and associated mastic, cove base and associated mastic, and carpet mastic may still remain in some of the mall tenant spaces (vacated retail spaces are abated prior to tenants taking occupancy).

Based upon Dames and Moore's findings, they recommended researching documents to assess the conditions at the Firestone, Sears Automotive Center, Camino Shell Station, and Plaza Camino

Project No. 09833-06-01 - 11 - March 2, 2010

Chevron to see if they have impacted the subject site. Dames and Moore also recommended an Operations and Maintenance Plan be prepared and implemented for the areas mentioned above where ACM is located, and stated that the ACM can be maintained in place and should be removed/replaced as renovation activities are planned at the mall or the condition of the material changes.

5. REGULATORY AGENCY RECORDS

Regulatory agency records pertaining to the Site and relevant nearby properties were searched for this assessment. The sources for this information included a regulatory database search firm (Section 5.1) and local government agencies (Sections 5.2 to 5.7). The information requested from local government agencies was based on the site reconnaissance activities, historical research, and environmental database review. A summary of information obtained from the sources contacted is presented below. Based on information obtained through written requests to local government agencies, it was judged that interviews of regulatory officials would not provide any additional or meaningful information to this Phase I ESA.

5.1 Database Review

Environmental Data Resources, Inc. (EDR), a regulatory database search firm, performed a search of federal, state, and local databases for the Site and surrounding areas. A reproduction of the report titled *The EDR Radius Map with GeoCheck, Plaza Camino Real, 2525 El Camino Real, Carlsbad, California* and dated January 15, 2010 is presented as Appendix I. The following table lists databases that were searched and the number of listings:

Database Name	Search Radius (Mile)	Site Listings	Adjacent Property Listings
FEDERAL DATABASES			
RCRA – SQG (RCRA – Small Quantity Generators)	1/4	1	1
FINDS (Facility Index System)	TP	1	0
HIST CORTESE	1/2	0	4
LUST (Geotracker's Leaking Underground Fuel Tank Report)	1/2	0	8
SLIC (Spills, Leaks, Investigation, and Cleanup Program)	1/2	0	5
UST (Active UST Facilities)	1/4	0	1
HIST UST (Hazardous Substance Storage Container Database)	1/4	0	3
SWEEPS UST (SWEEPS UST Listing)	1/4	0	3
San Diego Co. HMMD (Hazardous Materials Management Division Database)	TP	4	0
HAZNET (Facility and Manifest Data)	TP	7	0
SAN DIEGO CO. SAM (Environmental Case Listings)	1/2	0	7

Project No. 09833-06-01 - 12 - March 2, 2010

Database Name	Search Radius (Mile)	Site Listings	Adjacent Property Listings
ENVIROSTOR (EnviroStor Database)	1	0	1

Notes:

TP = Target Property

Sites may be listed in more than one database

5.1.1 Site

The EDR report states that the Site address was listed in four of the databases searched for this assessment. The following discussion provides detailed information regarding the listings associated with the Site. Based on the information provided in the listings, there is a low risk that the Site represents an environmental concern at the current time. The following table summarizes the listings associated with the Site and list the case status.

Property Name	Property Address	Database Listings	Status of the Case/Notes
1X May Dept Store Co Plaza Camino	2525 El Camino Real	HAZNET	HAZNET listings state that Asbestos- containing waste was disposed of multiple times from the building.
Westfield Plaza Camino Real	2525 El Camino Real	HAZNET	Unspecified solvent mixture waste was sent to a transfer station.
The Picture People Inc	2525 El Camino Real Unit 264	HAZNET	Other inorganic solid waste was recycled. Metal sludge was recycled.
The Picture People #48	2525 El Camino Real	San Diego Co. HMMD	No violations or delinquencies reported. Inventory not reported.
Dean's Photo #1079	2525 El Camino Real	San Diego Co. HMMD	One violation noted from 1996. Metal sludge was hauled away to be treated.
Expressly Portraits	2525 El Camino Real	San Diego Co. HMMD	No violations or delinquencies reported. Inventory not reported.
Fuji Trucolor, Inc	2525 El Camino Real #125	HAZNET	Other inorganic solid waste was recycled. Metal sludge was recycled.
Ritz Camera Centers	2525 El Camino Real	San Diego Co. HMMD	No violations or delinquencies reported. Inventory not reported
Ritz Camera Center #173	2525 El Camino Real	HAZNET	Photochemical/ photo processing waste was recycled.
Expressly Portraits Inc	2525 El Camino Real Unit 264	RCRA-SQG FINDS HAZNET	No violations found in the RCRA-SQG or the FINDS listings. Metal sludge was recycled. Photochemical/ photo processing waste.
Woolworths	2525 El Camino Real	HAZNET	Laboratory waste chemicals and off- specification, aged, or surplus organic waste were sent to transfer stations to be disposed.

Project No. 09833-06-01 - 13 - March 2, 2010

- San Diego Co. HMMD. The Site is listed under the Hazardous Materials Management Division Database. The listing does not identify any violations. The database notes that Sweetwater Carwash is associated with the property. Oil, lubricating AFT, petroleum naphtha (15% clear coat), carbon dioxide, and various weight oils are associated with the Site. Evergreen Environmental recycles the waste oil, and incinerates the used oil filters from the Site, and Asbury Environmental recycles the waste antifreeze and incinerates the organic solids collected from the Site.
- **HAZNET.** The Site is listed under the HAZNET database. The listing states that aqueous solutions with less than 10% total organic residues, hydrocarbon solvents, and aged or off-specification organics are associated with the Site.
- RCRA-SQG. The Site is listed under the RCRA-SQG database that is a comprehensive information system for sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQG) generate between 100 kg and 1,000 kg of hazardous waste per month. The property identified as a RCRA-SQG is located at 1536A Sweetwater Road and is named Continental Cleaners. This property is located approximately 0.144 miles southwest of the Site.
- **FINDS.** The Site is listed under the Faculty Index System database; however no information was given regarding the listing.

5.1.2 Nearby Properties

Based on the database search summarized in Section 5.1, the following discussion provides detailed information regarding properties reported to be located within an approximate 1 mile radius of the Site and the status of the listings associated with the properties. Based on the distances of these facilities from the Site, the status of the listings associated with the properties, and/or the direction of groundwater flow beneath the Site, there is a low risk that these facilities present an environmental concern to the Site at the current time. The following table summarizes the nearby properties that are associated with the database search, their address, the distance and direction of their location in relation to the Site, and the case status.

Property Name	Property Address	Direction (Distance in miles)	Database Listings	Status of the Case
Tune Craft #7	2521 South Vista Way	NE (0.180)	SWEEPS UST	Petroleum tank- no violations reported
Sears Roebuck & Co.	2561 El Camino Real	E (0.238)	HIST UST HAZNET	Two waste oil tanks, latex waste, hydrocarbon solvents, aqueous solution with less than 10% total organic residues, Liquids with halogenated organic compounds >1000 mg/l.

Project No. 09833-06-01 - 14 - March 2, 2010

• RCRA-SQG. The RCRA-SQG database is a comprehensive information system for sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQG) generate between 100 kg and 1,000 kg of hazardous waste per month.

Project No. 09833-06-01 - 15 - March 2, 2010

- ENVIROSTOR. The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types; Federal Superfund sites (NPL); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.
- **LUST.** The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank (UST) incidents. The data comes from the State Water Resources Control Board (SWRCB) Underground Storage Tank Information System.
- **SLIC.** The Spills, Leaks, Investigation, and Cleanup (SLIC) Program comes from the California Regional Water Quality Control Board.
- UST. The UST database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the SWRCB's Hazard Substance Storage Container Database.
- **HIST UST.** The HIST UST is the registered database for Historical USTs.
- **SWEEPS UST.** The Statewide Environmental Evaluation and Planning System list the underground storage tanks and was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.
- **HIST CORTESE.** The sites under the HIST CORTESE database are designated by the SWRCB (LUST), the Integrated Waste Board (SWF/LS), and the DTSC (CALSITES).

5.1.3 Non Geocoded (Unmapped) Sites

This portion of the regulatory database report identifies properties that have incomplete address information and could not be specifically plotted. Twenty listings of non-geocoded properties were identified in the searched databases. Based upon the information and addresses provided in the EDR database, none of the listed properties are interpreted to be located within ½-mile radius of the Site. Therefore, there is a low risk that the properties present an environmental concern to the Site at the current time.

5.2 California Department of Conservation Division of Oil and Gas

We reviewed California Department of Conservation Division of Oil, Gas, and Geothermal (DOGGR) maps to estimate the distance and direction to the nearest oil or gas wells from the Site (California Department of Conservation, 2009). Based on the information reviewed, one gas well located

Project No. 09833-06-01 - 16 - March 2, 2010

approximately 500 feet north of the Site. This well is listed as "plugged" and therefore not considered an environmental concern.

5.3 Water and Sewer Agencies

We contacted a representative of the Carlsbad Municipal Water District to obtain information pertaining to the reported source of water and method of sewage disposal for the Site, the location and depth of wells for the area, and any reported local drinking water contamination problems. We were informed that water in the area is purchased from the San Diego County Water Authority and consists of a blend of Colorado River and California State Project sources. In addition, the representative was not aware of reported drinking water contamination problems or of municipal drinking water wells onsite or in the general vicinity. Municipal sewage in the area is treated at the Encina Sewage Treatment Plant then released into the ocean or recycled as reclaimed water for landscaping.

5.4 San Diego County Department of Environmental Health (DEH)

We submitted requests to the San Diego County DEH for records pertaining to the Site and adjacent properties that were listed on the Geotracker website. A summary for the onsite and offsite cases from the DEH case files is presented below

5.4.1 Onsite Records

- Firestone 2545 El Camino Real. Three 10,000 gallon gasoline tanks were removed from the Site in March of 1984. During a hydraulic lift replacement in February 1987, total petroleum hydrocarbon (TPH) impacts were found in the soil. On October 19, 1990, a 550-gallon waste oil tank was removed from the area north of the garage and concrete driveway. Twelve borings and 21 groundwater monitoring wells were installed form 1987 to 1992. GTI was able to determine the extent of the TPH impacts at the Site. An area of 5 feet wide, 7 feet long, and 17 feet deep was excavated from the former location of the waste oil tank. A Corrective Action Plan (CAP) dated February 2, 2000, stated that the concentrations of TPH in groundwater monitoring wells near the Buena Vista Creek had been stable for two years, which indicated that combination of natural attenuation from the prior 13 years and remediation efforts had resulted in the reduced threat to potential receptors on and around the property. From April 2001 to January 2002, 527 pounds of vapor had been extracted, and 32,364 gallons of impacted groundwater had been removed from the extraction system located west of the Firestone structure. No free product has been detected since the year 2002. GTI stated that an estimated 3775 cubic yards of impacted soil exists at the Site. GTI's CAP recommending natural attenuation was approved on October 11, 2004. A Case Closure Summary dated February 28, 2006 was issued stating that the groundwater plume was stable and degrading, and if the plume was to migrate down-gradient it would flow into the sewage treatment plant and pump station before exiting into the lagoon. TPH was not detected in groundwater samples collected from wells nearest to the proposed construction or the Mall and is unlikely to migrate south towards the mall because groundwater flows towards the north.
- Sears Automotive Center 2561 El Camino Real. The Dames and Moore Phase I ESA from May 2000 stated that a waste oil tank was removed from Sears Automotive Center in 1986.

Project No. 09833-06-01 - 17 - March 2, 2010

However, no additional information was provided. Westfield stated that a clarifier, ASTs, and 16 hydraulic lifts are present at Sears Automotive Center.

5.4.2 Offsite Records

- Chevron Station 2500 El Camino Real. The Case Closure Summary dated July 13, 2006 stated that the contamination plume at Chevron Station was limited to the property. The summary stated that due to the stability of the remaining plume and the lack of potential impacts to Buena Vista Creek that the subsurface conditions at the property do not pose a significant risk to human health and does not pose a threat to beneficial use of ground or surface water resources in the area. The DEH stated that they concur with the findings of SECOR International Incorporated. The DEH issued a closure letter for the case on July 19, 2006.
- Day and Night Cleaners 2540 El Camino Real. The Day and Night Cleaners joined the Voluntary Assistance Program (VAP) in 1996 to assist with the clean up of minor concentrations of Tetrachloroethylene found in soil beneath the dry cleaning facility during an investigation. A URS report dated May 26, 1999 stated that groundwater was present 8 to 10 feet below ground surface (elevations 26 to 28 feet) with the groundwater direction towards the northwest at a flow gradient of 0.002. The groundwater sample collected from MW-4 (located between Vons and Sav-On) had the highest concentrations of Trichloroethylene (48 micrograms per liter (μg/l)) and Dichlorodifluoromethane (39μg/l). URS submitted a report dated May 1, 2000, to the DEH on behalf of the client, requesting closure of the property, based upon the soil vapor assessment that concluded the risk to human health would be acceptable. The case for the property was closed on September 11, 2000.
- Shell Service Station 2590 El Camino Real. The Second Quarter groundwater monitoring report dated July 28, 2008, prepared by Delta, reported detected concentrations of ethanol in MW-1, MW-2, MW-3 and MW-4 ranging from 110 μg/l to 140 μg/l. Methyl tert-butyl ether was detected in MW-1, MW-2, and MW-3, ranging from 1.3 μg/l to 40 μg/l. MW-2 and MW-3 had detected concentrations of Tertiary butyl alcohol, benzene, and TPH in the form of gasoline with the highest concentration of 2,800 μg/l, 3.2 μg/l, and 910 μg/l, respectively. Disopropyl ether was detected in MW-3 and MW-4 at concentrations of 350 μg/l and 2.7 μg/l, respectively. Ethylbenzene was detected at concentration of 2.2 in MW-3. At that time, Delta recommended testing the tanks and continuous monitoring due to the increase of ethanol from the last groundwater monitoring event. Delta produced a report titled Hydropunch Assessment and Updated Site Conceptual Model dated December 23, 2008. The report stated that the plume is located primarily in the vicinity of the existing dispenser islands. No remedial action has been conducted at the site, but all concentrations are stable or declining. Deltas workplan for additional site assessment dated April 13, 2009, was approved by the DEH May 26, 2009.

Groundwater monitoring wells from adjacent impacted properties nearest to the proposed construction had samples with concentrations lower than the method detection limit. However, if groundwater or impacted soil is encountered during construction, an environmental professional should be requested to assess the site conditions.

5.5 County of San Diego Department of Agriculture, Weights and Measures

We contacted the County of San Diego Department of Agriculture, Weights and Measures for information regarding pesticide use records for the Site. According to the Department personnel, no

Project No. 09833-06-01 - 18 - March 2, 2010

pesticide use records were found for the Site for the years 2000 through 2003. A copy of the letter from the agency is in Appendix H.

5.6 San Diego Air Pollution Control District

We submitted a request to the San Diego APCD for records pertaining to the Site. According to the APCD one violation was issued for 2525 El Camino Real on April 11, 1989. Multiple notifications for renovations are listed ranging from 1995 to 2004 with notes regarding asbestos removal from Robinsons-May and the former Woolworth. Agency records are attached in Appendix H.

5.7 City of Carlsbad Fire Prevention Department

We contacted the City of Carlsbad Fire Prevention Department for building information related to USTs and ASTs at the Site. We were informed that this information had been transferred to the County of San Diego DEH. The Fire Prevention Department stated that no fire violations were associated with the Site.

Project No. 09833-06-01 - 19 - March 2, 2010

6. FINDINGS

The Site is located west of El Camino Real, south of Highway 78, north of Marron Road, and east of South Vista Way in Carlsbad, California. The Site is currently occupied by the Westfield Plaza Camino Real Shopping Center in an enclosed two-story slab on-grade structure with approximately 145 retail specialty shops with additional detached buildings, consisting of approximately 1.1 million square feet. Westfield is planning to expand the eastern and southern side of the existing mall structure, the southeast corner of the existing parking lot, and the theatre building and the adjacent parking lot located south of Marron Road.

Based on our review of historical sources, and our interview with the site representatives, the Site was vacant until the late 1960's when the grading operations began at the Site. The first phase of the construction in 1968 included the eastern section of the mall, the First National Bank, and the area south of Marron Road. The second phase of the construction in 1979 included the western addition to the main section of the mall. From 1988 to 1989, the Site underwent renovation in the common areas of the main mall. The buildings appear to be in good condition, but due to the age of the structures it is possible that asbestos containing material (ACM) may be present in the plaster, pipes, tile and carpet mastic, or that lead containing paint (LCP) may be present in the wall paint. The buildings flooring cover varies from carpet, vinyl sheet, or vinyl tile with mastic.

We observed a waste oil aboveground storage tank (AST) located in the Firestone. Firestone also had four 55-gallon drums containing Mogul AG471. This facility has 12 hydraulic lifts and in general, housekeeping conditions appears to be good. Firestone does not appear to be considered a REC. We observed a waste oil AST located in the Sears Automotive Center on the northwest side of the facility along with six 55-gallon drums containing waste oil, and a waste antifreeze container. The facility also utilizes 16 hydraulic lifts for automobiles. In general, housekeeping conditions appears to be good and the Sears Automotive Center does not appear to be considered a REC.

DEH case files were reviewed for the following Sites:

- Firestone 2545 El Camino Real
- Sears Automotive Center 2561 El Camino Real
- Chevron Station 2500 El Camino Real
- Day and Night Cleaners 2540 El Camino Real
- Shell Service Station 2590 El Camino Real

Groundwater monitoring wells nearest to the proposed construction from impacted properties had samples with concentrations lower than the method detection limit, therefore the contamination plumes are not anticipated to impact the proposed construction area. However, if groundwater or impacted soil is encountered during construction, an environmental professional should be requested to assess the site conditions.

Project No. 09833-06-01 - 20 - March 2, 2010

Based on the results of this Phase I ESA, the following table presents a summary of findings and opinions associated with the ESA performed for the subject site, including known or suspect RECs, historical RECs and de minimis environmental conditions.

Assessment Category	Potential REC or REC (Y/N)	Recommended Actions	Report Section
Hazardous Substances/Petroleum Products	Y	NFA	2.2, 2.2.1, 5.1.1, 5.2, and 5.3
Hazardous Wastes	N	NFA	2.2, 2.2.2, and 5.3
Non-Hazardous Wastes	N	NFA	2.2
Aboveground/Underground Storage Tanks	Y	NFA	2.2, 5.1.1, and 5.4
Unidentified Substance Containers	N	NFA	2.2
Equipment Potentially Containing PCBs	N	NFA	2.2
Wastewater Systems	N	NFA	2.2 and 5.3
Evidence of Releases	N	NFA	2.2 and 5.4
Pools of Liquid, Pits, Ponds, Lagoons	Y	NFA	2.2 and 2.2.3
Wells	Y	NFA	2.2, 2.2.4, 3.3, 5.3 and 5.4
Other Site Issues	Y	NFA	2.2, 2.2.5, 4.3, and 5.4
Nearby Properties	N	NFA	2.3, 4.1, 4.3, 5.1, and 5.1.2
Historical Land Use – Site	N	NFA	4.0, 4.1, 4.3, 5.1.1, and 5.4.1
Historical Land Use – Nearby Properties	Y	NFA	4.0, 4.1, 5.1.2, and 5.4.2

Recommended Action:

AA = Additional activities should be conducted regarding the de minimis environmental condition(s) identified at the Site NFA = No further action required at this time.

7. OPINIONS, CONCLUSIONS, AND RECOMMENDATIONS

We have performed a Phase I Environmental Site Assessment, in conformance with the scope and limitations of ASTM E 1527-05, of the Site located at 2525 El Camino Real in Carlsbad, California. Any exceptions to, or deletions from, this practice are described in Section 1.2 of this report. This assessment has revealed no evidence of RECs in connection with the property, however, the following may be considered potential environmental concerns:

- The current structures onsite were built in the late 1960s and 1970s. Therefore, there is a risk that the structure contains ACM and/or LCP. We recommend conducting an asbestos and lead survey prior to any renovation/demolition activities to confirm whether evidence exists that the structure contains significant sources of ACM and/or LCP.
- Based upon the review of the DEH case files, the plumes from adjacent properties and the
 Firestone property have not migrated towards the proposed construction area. However, if
 groundwater or impacted soil is encountered during construction, an environmental
 professional should be requested to assess the site conditions.

It is the Environmental Professional's opinion that all appropriate inquiry has been conducted, in accordance with ASTM Standard E 1527-05 and 40 CFR Part 312, into the current/previous environmental condition of the Site, and that conditions indicative of releases or threatened releases of hazardous substances on, at, in or to the Site were identified (as indicated above)/were not identified. Further, it is the opinion of the Environmental Professional that the data gaps identified in Section 1.2 did not affect the ability of the Environmental Professional to render this opinion.

8. LIMITATIONS

The preliminary conclusions presented in this report are based upon reasonable visual observations made at the Site and research of available materials within the scope and budget of the contract. The information presented is relevant to the dates of our site visit and should not be relied upon to represent conditions at later dates. The opinions expressed herein are based on our experience with similar studies and information obtained during our effort. If additional information becomes available, we request the opportunity to review the information and modify our opinions, if necessary.

The visual observations we made were limited to accessed portions of the Site and the contiguous sites. Subsurface exploration, soil and groundwater sampling, and analytical laboratory testing were not within the scope of this study. In addition, this study did not include the following:

- A 50-year chain-of-title report pertaining to the Site was not provided by the Client or obtained by us at the request of the Client and
- The site location is not mapped on the Historical Sanborn Fire Insurance Maps.

The Phase I ESA at the Site was conducted by us expressly and solely for Mr. Dennis Marcin of HELIX Environmental Planning, Inc. Any reliance upon the information, conclusions, or recommendations contained in this report for purposes other than the transfer of the subject property shall be at the sole liability of the party undertaking such use.

Our services have been conducted using the degree of care and skill ordinarily exercised, under similar circumstances, by environmental sciences consultants practicing in this or similar localities. No other warranty, express or implied, is made as to the professional opinions presented in this report. We are not responsible for the conclusions, opinions, or recommendations made by others based on this information.

This report was compiled based partially on information supplied to us from outside sources, other information that is in the public domain, and visual observations made at the property. The preliminary conclusions and recommendations herein are based solely on the information we obtained in compiling the report. We make no warranty as to the accuracy of statements made by others which may be contained in the report, nor are any other warranties or guarantees, express or implied, included or intended by the report except that it has been prepared in accordance with the current generally accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by other professional consultants or firms performing the same or similar services. This report is intended to be used by the party authorizing the audit for the transfer of the property audited. None of the work performed hereunder shall constitute or be represented as a legal opinion of any kind or nature, but shall be a representation of findings of fact from records examined.

Project No. 09833-06-01 - 23 - March 2, 2010

This evaluation does not address the presence of the following conditions unless specifically stated otherwise:

- Radon, electromagnetic fields, asbestos, lead-containing paint, mold, burn ash, lead in drinking water, methane gas, and wetlands;
- Chemical compounds which naturally occur in the environment;
- Commonly used household cleaning products, building materials, and consumables that may be hazardous; and
- Contaminants or contaminant concentrations that are not currently a concern but may be under future regulatory standards.

10. QUALIFICATIONS

Jack Keener states the following:

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR Part 312. I have the specific qualifications based on education, training, and experience, to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Jack Keener

APPENDIX A

PHASE I ENVIRONMENTAL SITE ASSESSMENT TERMS

Adjoining/Adjacent Property Any real property or properties the border of which is

contiguous or partially contiguous with that of the Site, or that would be contiguous or partially contiguous with that

of the Site but for a street, road, or other public

thoroughfare separating them.

Business Environmental Risk A risk that can have a material environmental of

environmentally-driven impact on the business

associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated as part

of a Phase I ESA.

Data Failure A failure to achieve the historical research objectives

associated with a Phase I ESA.

Data Gap A lack of or inability to obtain information required as part

of a Phase I ESA despite good faith efforts by the environmental professional to gather such information.

De Minimis Environmental Condition
An environmental condition that generally does not

present a material risk of harm to public health or the environment, and that generally would not be the subject of an enforcement action if brought to the attention of

appropriate governmental agencies.

Due Diligence The process of inquiring into the environmental

characteristics of a parcel of commercial real estate or other conditions, usually in connection with a commercial

real estate transaction.

Engineering Control A physical modification to a site or a facility to reduce or

eliminate the potential for exposure to hazardous substances or petroleum products in the soil or

groundwater on the property.

Environmental Lien A charge, security, or encumbrance upon title to a

property to secure the payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup, or other remediation of hazardous substances

or petroleum products upon a property.

Environmental Professional A person meeting the education, training and experience

requirements as set forth in 40 CFR §312.10(b).

Fill Dirt Dirt, soil, sand, or other earth that is obtained off-site that

is used to fill holes or depressions, create mounds, or otherwise artificially change the grade or elevation of real

property.

Fire Insurance Maps Maps produced for private fire insurance map companies

that indicate uses of properties at specified dates and

that encompass the Site.

Historical Recognized Environmental

Condition

An environmental condition which in the past would have been considered a recognized environmental condition, but which may or may not be considered a recognized

environmental condition currently.

Institutional Control A legal or administrative restriction on the use of, or

access to, a site or facility to (1) reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the property, or (2)

prevent activities that could interfere with the

effectiveness of a response action, in order to ensure

PHASE I ENVIRONMENTAL SITE ASSESSMENT TERMS

maintenance of a condition of no significant risk to public

health or the environment (e.g., a deed restriction).

Material Threat A physically observable or obvious threat which is

reasonably likely to lead to a release that, in the opinion of the environmental professional, is threatening and might result in impact to public health or the environment.

Pits, Ponds, or Lagoons Man-made or natural depressions in a ground surface

that are likely to hold liquids or sludge containing hazardous substances or petroleum products.

Practically Reviewable Information that is provided by the source in a manner

and in a form that, upon examination, yields information relevant to the property without the need for extraordinary

analysis of irrelevant data.

Reasonably Ascertainable Information that is (1) publicly available, (2) obtainable

from its source within reasonable time and cost constraints, and (3) practically reviewable.

Recognized Environmental Condition The presence or likely presence of any hazardous

substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground

water, or surface water of the property.

Sump A pit, cistern, cesspool, or similar receptacle where

liquids drain, collect or are stored.

Underground Storage Tank

Any tank, including underground piping connected to the

tank, that is or has been used to contain hazardous substances or petroleum products and the volume of which is 10 percent or more beneath the surface of the

around.

Wastewater Water that (1) is or has been used in an industrial or

manufacturing process, (2) conveys or has conveyed sewage, or (3) is directly related to manufacturing, processing, or raw materials storage areas at an

industrial plant.

APPENDIX B

GEOTECHNICAL . ENVIRONMENTAL . MATERIAL

Proposal No. EP-2009-067A October 14, 2009

BY E-MAIL AND U.S. MAIL

Mr. Dennis Marcin HELIX Environmental Planning, Inc. 7578 El Cajon Boulevard, Suite 200 La Mesa, California 91942

Subject: PLAZA CAMINO REAL

CARLSBAD, CALIFORNIA

PROPOSAL FOR PHASE I ENVIRONMENTAL SITE ASSESSMENT

Dear Mr. Marcin:

In accordance with your request and on behalf of HELIX Environmental Planning, Inc., we present this proposal to perform a Phase I Environmental Site Assessment (ESA) for the revitalization and limited expansion of the Plaza Camino Real shopping center located west of El Camino Real, north of Marron Road, and south of State Route 78 in Carlsbad, California (the Site).

PURPOSE AND SCOPE OF SERVICES

We propose to perform a site reconnaissance and preliminary research to estimate the potential for existing impacts to the Site (i.e., levels of hazardous materials/wastes likely to warrant mitigation pursuant to current regulatory guidelines) from the presence of hazardous materials/wastes on or within the vicinity of the Site. The guidelines used for the definition of hazardous materials/wastes are referenced in the California Code of Regulations (CCR), Title 22, Division 4.5. The proposed scope of services for the Phase I ESA will be conducted in general accordance with the American Society for Testing and Materials (ASTM) Standard Practice E 1527-05. The Phase I ESA also will be conducted in general accordance with the requirements of 40 Code of Federal Regulations (CFR) Part 312 titled Standards and Practices for All Appropriate Inquiries, as required under Sections 101(35)(B)(ii) and (iii) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The purpose of conducting an All Appropriate Inquiries (AAI) investigation into the previous ownership and uses of a property is to meet the provisions necessary for the landowner, contiguous property owner, and/or bona fide prospective purchaser to qualify for certain landowner liability protections under CERCLA.

The specific scope of work to be conducted for the Phase I ESA is discussed below.

• Perform a visual survey of the adjacent properties from the Site and from public thoroughfares to observe general types of existing land use surrounding the Site. Perform a visual reconnaissance of the Site for indicators of hazardous materials, hazardous wastes, or soil and/or groundwater impacts on the Site. The indicators referenced include, but are not limited to, 55-gallon drums, underground and aboveground storage tanks, chemical containers, waste storage and disposal areas, industrial facilities, discolored surface soil, electrical transformers

that may contain polychlorinated biphenyls (PCBs), and areas conspicuously absent of vegetation. The Client will be responsible for providing us with a site plan that clearly depicts the site boundary. The Client will also be responsible for obtaining permission for our personnel to enter the Site. Our ability to complete the assessment described herein may be hindered if access is unavailable to any portion of the Site. Provisions for an assessment of wetlands, earthquake faults, asbestos, lead-containing paint, lead in drinking water, mold, burn ash, radon gas, methane gas, and building vapor intrusion are not included in this scope of services.

- Perform a visual survey of the adjacent properties from the Site and from public thoroughfares to observe general types of existing land use surrounding the Site.
- Review and interpret U. S. Geological Survey (USGS) topographic maps to obtain information relative to the topography and physical setting of the Site, and previous development and uses of the Site and properties within approximately 1/4-mile of the Site.
- Review pertinent and reasonably obtainable information sources to evaluate physiographic, geologic, and hydrogeologic conditions in the vicinity of the Site. The review will not include or address earthquake faults on the Site or in the Site's vicinity.
- Review publicly-available historical sources of information pertaining to the Site and nearby properties. Such sources of information may include the following: aerial photographs, building permits, historical city directories, topographic maps, and Sanborn fire insurance maps. Research of these sources will be conducted from the present back to when the property first contained structures or was used for residential, agricultural, commercial, industrial, or governmental purposes.
- Conduct interviews by telephone or in writing with representatives of the current owner(s) and occupant(s) of the Site to evaluate if present or past occupants have used, generated, stored, or disposed of hazardous materials/wastes onsite. In order to obtain information regarding the past occupants and uses of the Site, it may be necessary for us also to interview past owners and/or occupants of the Site. The names and telephone numbers of the contacts for the above interviews are to be provided by the Client.
- Review <u>documents provided by the Client</u>, and at the Client's discretion. Potentially useful documents may include previously prepared geotechnical, geologic, and environmental reports; site plans; plot plans; tenant lists; and correspondence with regulatory agencies. The Client is required to provide the following information/documentation for the Phase I ESA, if available: information regarding liens recorded against the Site for environmental cleanup activities; documentation regarding any land use or activity limitations pertaining to the Site (e.g., building restrictions, water treatment systems); any specialized knowledge pertaining to environmental conditions associated with the Site, based on the Client's knowledge of the Site or the area in which the Site is located; and information regarding whether the purchase price for the Site is significantly different from the fair market value and, if so, the reason for the difference.
- If requested, review recorded land title records for the Site in accordance with the requirements identified in 40 CFR Part 312. A 50-year chain-of-title report must be obtained from a title company by the Client, and at the Client's expense, if we are to perform this task. The purpose of obtaining a chain-of-title report is to assess whether any requirements regarding engineering and institutional controls have been recorded for the Site, and whether any land use restrictions and/or environmental cleanup liens are associated with the Site.

- Conduct a search of federal, state, and local databases for the Site and surrounding area to obtain information regarding the potential presence of hazardous materials/wastes on the Site or on properties located within the approximate distances specified by ASTM Standard Practice E 1527-05 and 40 CFR Part 312. The records searched will include registries or publicly available lists of recorded engineering and institutional controls, and recorded land use restrictions that may impact the Site.
- Contact local public agencies by telephone or in writing to acquire readily obtainable information regarding underground storage tank permits, agriculturally-related permits and violations, air emission permits and violations, source of water and method of sewage disposal, location and depth of nearest drinking water wells, and electrical transformers. The information will be obtained for the Site only. The agencies contacted may include, but will not necessarily be limited to, the local fire department, air pollution control agency, agriculture department, water and sewer agencies, and gas and/or electric utility companies.
- Review reasonably obtainable regulatory agency files for the Site, if available, and/or properties in the vicinity of the Site whose environmental conditions might potentially impact the Site. These properties will be identified based on our review of the above-referenced databases and our visual reconnaissance activities. We will review regulatory agency files for up to four (4) properties of potential environmental concern located in/near the boundaries of the Site. If we determine that additional file review activities are warranted, the Client will be contacted for authorization prior to performing the additional activities and our fee will be adjusted accordingly.
- Prepare a report summarizing the findings of the Phase I ESA. The report will qualitatively describe the potential for environmental impairment at the Site. If necessary, the report will also provide recommendations for additional environmental services (e.g., a Phase II ESA), based on the findings of the Phase I ESA. The report will identify any "data gaps" (i.e., lack of or inability to obtain information required by ASTM Standard Practice E 1527-05 and 40 CFR Part 312). If the data gaps influence our ability to render an opinion regarding the environmental condition of the Site, the report will comment on the significance of the data gap(s).

Please note that 40 CFR Part 312 requires that, in addition to the Phase I ESA, the activities described below be conducted by the prospective purchaser of the property in order for the purchaser to qualify for liability protection under CERCLA. It is the responsibility of the prospective purchaser to:

- conduct a search for the existence of environmental cleanup liens against the Site filed or recorded under federal, tribal, state, or local law;
- consider the specialized knowledge the prospective purchaser has of the Site, the area surrounding the Site, the conditions of adjoining properties, and any other experience relevant to the environmental condition of the Site;
- consider the relationship of the purchase price of the Site to the value of the Site if it were not contaminated; and
- consider commonly known or reasonably ascertainable information within the local community about the Site to the extent not otherwise obtained during the preparation of the Phase I ESA.

These activities are **not** included in the scope of work for this assessment.

PROPOSED FEE AND SCHEDULE

We propose to complete the Phase I ESA on a "lump sum" basis for a fee of \$. If site conditions significantly different than those provided to us for purposes of preparing this proposal are identified or as additional information is obtained, it may become necessary to revise the scope of services and associated fee.

The fee is valid for a period of 60 days from the date of this proposal. The fee includes the submittal of two hardcopies and an electronic copy of the final report. Additional copies of the final report may be requested for an additional administrative fee. The final report will be provided to you within approximately 7 to 14 business days after receipt of written authorization to proceed.

Consultation services rendered after the issuance of the report and/or charges required for reviewing and copying regulatory records would be billed on a "time and materials" basis in accordance with the enclosed 2006 Schedule of Fees for Environmental Services/Terms and Conditions, which are incorporated into and made a part of this proposal, and would be additive to the proposed fee.

It is mutually agreed between us and the Client that all services afforded and work we perform are provided pursuant to Civil Code Section 2782, *et. seq.*, and such agreement is expressly integrated into and made a part of any and all contracts or agreements entered into between the parties.

EXECUTION OF CONTRACT

Please carefully review the contents of this proposal and the enclosed *Terms and Conditions for Performance of Services (Terms)*. If they meet with your approval, execute both copies of the *Terms* and return both copies to our office. We will then endorse the documents and return one fully executed copy to you. We will commence with the scope of services outlined herein upon receipt of your written authorization. Services we provide will be pursuant to the *Terms* and *2006 Schedule of Fees for Environmental Services* until or unless a mutually agreed upon, negotiated contract is finalized.

We appreciate the opportunity to assist you on this project. Please call us if you have any questions.

Sincerely,

GEOCON CONSULTANTS, INC.

2009 Enhancements to EDR City Directory Abstract

New for 2009, the EDR City Directory Abstract has been enhanced with additional information and features. These enhancements will make your city directory research process more efficient, flexible, and insightful than ever before. The enhancements will improve the options for selecting adjoining properties, and will speed up your review of the report.

City Directory Report. Three important enhancements have been made to the EDR City Directory Abstract:

- 1. *Executive Summary*. The report begins with an Executive Summary that lists the sources consulted in the preparation of the report. Where available, a parcel map is also provided within the report, showing the locations of properties researched.
- 2. Page Images. Where available, the actual page source images will be included in the Appendix, so that you can review them for information that may provide additional insight. EDR has copyright permission to include these images.
- 3. Findings Listed by Location. Another useful enhancement is that findings are now grouped by address. This will significantly reduce the time you need to review your abstracts. Findings are provided under each property address, listed in reverse chronological order and referencing the source for each entry.

Options for Selecting Adjoining Properties. Ensuring that the right adjoining property addresses are searched is one of the biggest challenges that environmental professionals face when conducting city directory historical research. EDR's new enhancements make it easier for you to meet this challenge. Now, when you place an order for the EDR City Directory Abstract, you have the following choices for determining which addresses should be researched.

- 1. You Select Addresses and EDR Selects Addresses. Use the "Add Another Address" feature to specify the addresses you want researched. Your selections will be supplemented by addresses selected by EDR researchers using our established research methods. Where available, a digital map will be shown, indicating property lines overlaid on a color aerial photo and their corresponding addresses. Simply use the address list below the map to check off which properties shown on the map you want to include. You may also select other addresses using the "Add Another Address" feature at the bottom of the list.
- 2. *EDR Selects Addresses*. Choose this method if you want EDR's researchers to select the addresses to be researched for you, using our established research methods.
- 3. You Select Addresses. Use this method for research based solely on the addresses you select or enter into the system.
- 4. Hold City Directory Research Option. If you choose to select your own adjoining addresses, you may pause production of your EDR City Directory Abstract report until you have had a chance to look at your other EDR reports and sources. Sources for property addresses include: your Certified Sanborn Map Report may show you the location of property addresses; the new EDR Property Tax Map Report may show the location of property addresses; and your field research can supplement these sources with additional address information. To use this capability, simply click "Hold City Directory research" box under "Other Options" at the bottom of the page. Once you have determined what addresses you want researched, go to your EDR Order Status page, select the EDR City Directory Abstract, and enter the addresses and submit for production.

Questions? Contact your EDR representative at 800-352-0050. For more information about all of EDR's 2009 report and service enhancements, visit www.edrnet.com/2009enhancements

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1903 through 2006. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

Elizabeth A Hartung Geocon Inc 6960 Flanders Drive San Diego, CA 92121

PUBLIC INFORMATION NUMBER: 10-RP0016

Dear Ms. Hartung:

In response to your request, pesticide use records for 2007through 2009 were reviewed and no pesticide records for the sites requested was located. See the attached request.

Please note our records reflect pesticides used in agricultural settings. No other pesticide uses are required to be reported by site. Therefore, our records only include sites where an agricultural commodity was produced at the site in the last four years, and where pesticide use was reported to this department. Our records do not include information on pesticides used in urban settings.

If you need to determine the presence or absence of pesticide residues at a location, you should contact an approved lab. We can provide a list of approved labs, which would provide such a service.

Sincerely,

NGANHA DANG

Deputy Ag Commissioner/Sealer

INSPECTION OF PUBLIC RECORDS

The district shall make a determination if the records requested are available with the exception of those records specifically exempted from disclosure by state law and those records labeled as "TRADE SECRET" which are not emission data, within ten (10) days of the date of the receipt of the request. If, for good cause, the determination cannot be made within the ten (10) working days, the District will notify the requesting person the reasons for the delay and when the determination is expected to be made within an additional 14 days, as prescribed by law. Those records labeled as "TRADE SECRETS" shall be governed by the procedure set forth in District Rule 177 Section (g).

If you have any questions, please contact Public Records at (858) 586-2618.

Mail or fax completed form to:

San Diego APCD Public Records 10124 Old Grove Road San Diego, CA 92131

Phone: (858) 586-2600

Fax No.: (858) 586-2601

Revision Information

Revision postmarked 6/24/03: increase of RACM to 8,662 sqft, and completion date for asbestos removal changed to 1/22/04. \$5: paid with receipt # 97056990

Revision postmarked 6/26/03: increase of RACM to 9,662 sqft (Still under 10,000 sqft (same category)). \$45 revision fee collected receipt # 97057037

Revision postmarked 8/13/03: Completion date for asbestos removal changed to 1/22/04, and RACM surface area changed to 10,60 sqft. \$201 fee collected with receipt # 97058015.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/11/2009 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

SHELL SERVICE STATION	2590 EL CAMINO REAL	E 1/8 - 1/4 (0.245 mi.)	C22	43

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 11/09/2009 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 11/12/2009 has revealed that there are 8 LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, and dated 11/12/2009 has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D000 Waste name: Not Defined

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

TAPE Where no futfler response is appropria

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/11/2009 Date Data Arrived at EDR: 12/17/2009 Date Made Active in Reports: 01/11/2010

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2007 Date Data Arrived at EDR: 08/26/2009 Date Made Active in Reports: 09/11/2009

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data Source: PennWell Corporation

Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its

fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary

and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Elevation: 33 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 33117-B3 SAN LUIS REY, CA

Most Recent Revision: 1997

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County FEMA Flood Electronic Data

SAN DIEGO, CA Not Available

Flood Plain Panel at Target Property: Not Reported

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

SAN LUIS REY

YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

	LOCATION	GENERAL DIRECTION
MAP ID	FROM TP	GROUNDWATER FLOW
1	1/8 - 1/4 Mile ENE	NE
2	1/4 - 1/2 Mile NE	SE

For additional site information, refer to Physical Setting Source Map Findings.

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: SALINAS

Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep,

moderately well and well drained soils with moderately coarse

textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

			Soil Layer	Information			
	Воц	ındary		Classi	fication	Saturated hydraulic conductivity micro m/sec	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	22 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9
2	22 inches	46 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9
3	46 inches	64 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9

Soil Map ID: 2

Soil Component Name: TIDAL FLATS

Soil Surface Texture: variable

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high

water table, or are shallow to an impervious layer.

Soil Drainage Class: Very poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

	Soil Layer Information										
	Bou	Boundary Classification		Boundary		Classification Saturated hydraulic

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map. USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database Source: Department of Health Services

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208 Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency

(USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor

radon levels.
